

AVP-1 AIR VENT

- AIR & VACUUM RELIEF
- CORROSION RESISTANT
- HIGH SENSITIVITY AT LOW PRESSURES
- FEMALE PIPE THREAD FOR USE ON STANDARD RISERS

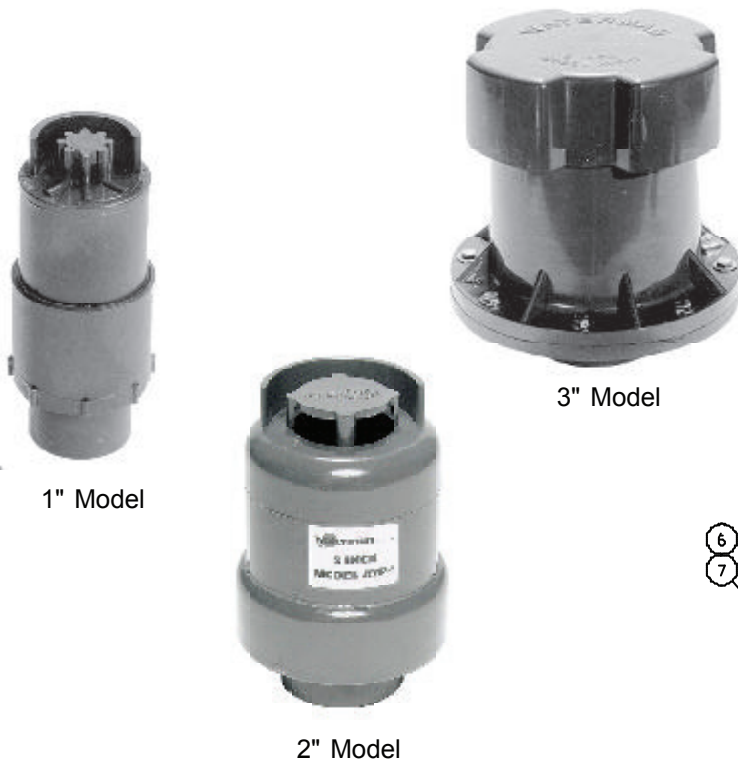

USES:

Designed for drip irrigation, stock watering, and similar applications in addition to use on gravity and higher pressure systems.

FEATURES:

The AVP-1 is an atmospheric type vent made of PVC for the advantages of impact resistance, inherent high stress ratings, and resistance to corrosiveness of chemicals, acids, and alcohols. PVC ensures a product that is durable and dependable.

The AVP-1 seals effectively from 2 psi to 110 psi and is recommended particularly for drip irrigation. In addition, the valve operates up to 20 degrees from perpendicular. It is baffled to prevent premature closing from high air velocities.

PARTS LIST		
NO.	NAME	Qty.
1	Body/Cover	1
2	Float	1
3	Baffle	1
4	O-Ring	1
5	Base	1
6	Hex Head Bolt	8
7	Washer	8
